3° outside when we woke up this morning. Unpleasant
≈ 30° in GND - lots of rain, which sounds normal for GND in Oct.

I set the hot water heater to "Hot", lit the fireplace pilot, and bought an extra jug of milk.

Robert @ to yxz should be here in 10 minutes.

Kate (CDN) & Uwe (GMY) are very cordial & I would recommend a stay a laid back ocean studio - no A/C but wonderful breeze.

It's full bright @ 0530, so
attempting to sleep in is
pointless.

Looked for seaglass on
the way home from

passed another, so

green-brown without

if I can have it.

Huh. That went far less

me 10' feet closer.

I proposed on
Jose's brother's
